How to carry out a nasal swab test

This information sheet explains how to carry out a nasal swab test. It is important to follow these instructions to make sure the test is completed correctly.

Contents of the test kit

- Paper form with information details about you.
- How to carry out a nasal swab test leaflet.
- Patient letter asking you to take the test.
- White return envelope labelled UN3373 with a return address label attached and a pre-paid postage sticker.
- Swab stick.
- White absorbent material sheet.
- Plastic transport case for swab.
- Blue and clear plastic bag marked 'Safety bag'.

Before you start

- Allow about 20 minutes to carry out the nasal swab test.
- It is important that you post the nasal swab test sample back to us on the day you carry out the test. So, make sure you have enough time to go to your local post box before you start the test.

Taking the swab

1. Wash your hands with soap and water for at least 20 seconds before and after taking the sample.
2. You will see a cotton-tipped swab stick and a plastic tube inside the test kit. See Picture 1 on page 2.
3. Undo the white top of the plastic tube and set the top to one side. You will no longer need this white top.
4. Tilt your head back a little.
5. Now use the cotton-tipped swab to take nasal samples from each nostril in turn.

Insert the cotton-tipped end into the first nostril (Picture 2). Rotate (turn) the swab against the inside of the nostril for 3 seconds moving it around in 10 circles so the swab touches the walls of the nostril. Now use the same swab to repeat the same actions on your other nostril.

Picture 2

6. Once you have taken the swab, put the swab stick inside the tube. Press the top of the swab down firmly to make sure it is sealed inside the tube.

7. Wrap the white absorbent material (Picture 3) around the tube. Place the wrapped tube into the transport plastic case, also called a blister pack (Picture 4).

Picture 4

Picture 5

8. Place the transport plastic case into the plastic safety bag (Picture 5) and seal it.

9. You will find a paper form in your test kit with information details about you and the test. Write the date and time the nasal swab sample was taken clearly on the form.

10. Place this form and the plastic safety bag containing the nasal swab sample in the return envelope (marked UN3373). Picture 6. Seal the bag.

Record your sample

Now submit an online form so we know that your test is on its way to us. You can access the form in 1 of 2 ways:

1. Go to our website **www.rbht.nhs.uk**

Search for 'Confirmation that your home testing sample has been dispatched'

Fill out the web form that appears on your screen.

2. Or scan the QR code below with your smartphone or tablet to open the web form.

Fill out the form and submit it.

Post your sample

Remember to post the sample back to us on the day you carry out the test. The return envelope should have a postage paid sticker and a label with the address of our laboratories stuck to it. Please check the return envelope has both stickers before you post it. The envelope can be posted into your nearest post box.

More information
