

A lifetime of specialist care

Nuclear medicine MAG3 renogram - appointment information

Name:

Date:

Time:

Points to remember

- Please telephone us on 01895 826 514 within seven days of receiving this letter to confirm that you can attend your appointment. Unfortunately, if we do not hear from you, your appointment may be given to someone else.
- Please drink one litre of fluid on the morning of your scan. This can be tea, coffee, water or another drink of your choice. There is no need to have a full bladder.
- Please take your normal medication, but please tell the technologist before the scan if you are taking diuretics (water tablets) such as furosemide.

What is nuclear medicine?

Nuclear medicine is a special way of taking images of your body. Before we can take these images, we need to give you an injection containing a radioactive tracer. This is a substance with a small amount of radioactivity that highlights the part of the body we need to see in more detail.

About your MAG3 renogram

We will give you an injection containing a small amount of radioactive material, which will show us if your kidneys are working normally. We will ask you to lie still on a scanning bed while the camera takes images of your body. This takes about 40 minutes and it is important that you keep still during this time.

How long will the appointment take?

You will be with us for about two hours.

Is there any risk from the radiation?

The amount of radiation used is small and kept to a minimum. We believe that the benefits of having the test far outweigh any risks. To avoid exposing children unnecessarily to radiation, please do not bring them with you to the department. Please ask if you have any questions.

Female patients

You should not have this scan if you are pregnant, think you may be pregnant, or are breastfeeding.

Diabetics

You do not need to change your diet or treatment. Please bring your insulin and any snacks as needed.

Are there any side effects?

The substance we give you will not make you sleepy or stop you from driving a car.

After your scan

You can eat and drink as usual and continue with your normal daily activities after your scan.

Please try to avoid long periods of close contact with children for the rest of the day. This is to avoid exposing them to unnecessary radiation.

Results

We will send the results of your scan to the hospital consultant who asked for the test.

Additional information

Please note that our nuclear medicine department scans many people every day. We try to keep to your appointment time as closely as possible but should you be late, or if there is an emergency at the hospital, it may not be possible to perform your scan immediately.

Ambulance

If you need an ambulance to bring you to us, please ask your family doctor to arrange this.

Private patients

If you are a private patient please bring your private insurance details to your appointment, otherwise, please pay your invoice on the day of your scan.

How to find us

The nuclear medicine department is in the ANZAC Centre, ground floor, Harefield Hospital.

Useful contacts

If you have any questions about your scan, or want to change the appointment date, please call us on 01895 826 514, Monday to Friday, 9am to 5pm.
